

Project Update: March 2012

Plant identification is still on going. So far, we have identified 76 species which belongs to 36 families of pioneer plant on Mt. Merapi. For birds' species, up to March 2012, we also have identified 45 species.

Left: *Polygala paniculate*. Right: *Anaphalis javanica*.

Left: *Pinus merkusii*. Right: *Phyllanthus urinaria*.

Left: *Spizaetus bartelsii*. Right: *Erythura prasina*.

Left: *Halycon cyanoventris*. Right: *Lanius shach*.
