

## **Project Update: August 2012**

We have just published our Assamese macaque (*Macaca assamensis*) presence only data (collected from 2005 to 2012 in Nepal Himalaya) in USGS website. These data are globally and publicly available in the following website and anyone can use it for the prediction, distribution modelling and for the good management purpose of the species. These are the largest presence only data set for Assamese macaque available to date and in the form of ISO Standard METADATA.
