

Project Update: August 2012

The ICOSCAD second RSG has started by revising the teaching manual and discussing the course of action with the project management team. Six local schools have been selected in the first six sectors to be targeted during phase one of the project. Fourteen young people to be trained in each sector have been informed and almost all previous trained local leaders in those six sectors have been contacted to facilitate in coming training.

In participatory discussions, the project team and target group have agreed upon the schedule of training which will start on 1st September 2012 as local students will have then finished their holidays and gone back to school.
