

### **Project Update: May 2013**

It was a good idea for us to adapt and promote this new version of Improved Cooking Stove (locally known as canarumwe).

Because, this stove has been much more affordable to construct and sounded more popular among the trained students, teachers and local community. This can be evident by such increased number of people and teachers who have earned canarumwe stove immediately after training sessions.

Uwingabiye Donatille, the Vice Mayor in charge of Social Affairs of Gisagara District, has been to our training sessions and liked it so much. She asked ICOSCAD to kindly consider the Kivugiza IDP Model Village in its plan. Thus, On this coming week, ICOSCAD is conducting its two last training sessions in Kibirizi Sector and constructing Improved Cooking Stoves for 25 vulnerable families in that Model Village of Kivugiza.

Local leader on training of primary school students in Ndora Sector
