

## Project Update: May 2016

Today, we released a fantastic new frog rescue video! In this short film, you can see some of the beautiful frogs we're working to save from extinction and hear our Director, Jonathan Kolby, speak about the global crisis caused by the spread of chytrid fungus. Click here to watch this video: [Hope in the Midst of Chytrid](#)

We really appreciate all of our followers and would like to extend an extra special 'thank you' to everyone who has already contributed towards our crowdfunding event ([view the details here](#)).

We also recently created a video library on YouTube where you can see all our previous videos at your leisure: [HARCC FrogRescue](#)

Enjoy these videos and please share with anyone who might also be interested in our wildlife conservation efforts.
