

Project Update: June 2014

REPORT ON THE WORLD ENVIRONMENT DAY/CHILDREN FOR NATURE CONSERVATION DAY EVENT, 5th June 2014

We had a successful final event on World Environment Day. Find below a summary of the events that took place.

The event which had its theme as: Climate change and what you can do, coincided with the world environment day, with the theme: raise your voice, not the sea! We had over 100 children and about 50 adults in attendance. Activities ranged from drama presentations, poems, speeches, lectures, and several outdoor events. The aim was to let children and their teachers enjoy the beauty and fun of being out in the wild, while also learning about how our small actions can have either positive or negative effects on the earth, including our lives! It was exciting hearing the kids teach us adults on photosynthesis, global warming, and the effects of deforestation. Overall, we can see that our aim of creating awareness on key environmental issues in the minds of children is beginning to yield positive results and we are pleased with this.
