

## Project Update: July 2014

### Activities completed so far:

- A second inventory of captive birds with interesting results in three communities and two cities.
- Between June 24th and July 7<sup>th</sup>, 2014, we did captive bird sampling in five localities: Morón city, Bolivia city, Malezal, La Loma, El Yarual. We worked with children between 4 and 11 years old, a protected areas worker and project staff in order to insert this activity in the protected areas schedule.
- We identified 20 species in captivity, highlighting the presence of the endemic Gundlach's hawk, Cuban black-hawk, Cuban parakeet, and the threatened West Indian whistling-duck among others.
