

Project Update: July 2014

We have started our field season on Paramushir Island (Northern Kuril Islands). We got in touch with Anna Zavadskaya http://www.rufford.org/rsg/projects/anna_zavadskaya and she helped us to make up a questionnaire for local stakeholders and tourists to reveal their attitude to the problems of marine habitat conservation. We have promoted the ideas of the project through our Facebook page (<http://www.facebook.com/russianorca>) and our Vk page (<http://vk.com/russianorca>). We invited the followers of our pages to create a logo for our study.
