

## The Rufford Foundation

### Final Report

---

Congratulations on the completion of your project that was supported by The Rufford Foundation.

We ask all grant recipients to complete a Final Report Form that helps us to gauge the success of our grant giving. The Final Report must be sent in **word format** and not PDF format or any other format. We understand that projects often do not follow the predicted course but knowledge of your experiences is valuable to us and others who may be undertaking similar work. Please be as honest as you can in answering the questions – remember that negative experiences are just as valuable as positive ones if they help others to learn from them.

Please complete the form in English and be as clear and concise as you can. Please note that the information may be edited for clarity. We will ask for further information if required. If you have any other materials produced by the project, particularly a few relevant photographs, please send these to us separately.

Please submit your final report to [jane@rufford.org](mailto:jane@rufford.org).  
 Thank you for your help.

**Josh Cole, Grants Director**

---

Grant Recipient Details	
<b>Your name</b>	Sagar Dahal
<b>Project title</b>	Re-accessing and identifying the conservation needs of Fishing Cat after 1836 in Bankalwa, Sunsari, Nepal
<b>RSG reference</b>	1765
<b>Reporting period</b>	2016-2017
<b>Amount of grant</b>	£3780
<b>Your email address</b>	sagardahalinktm@gmail.com
<b>Date of this report</b>	28/03/2017

**1. Please indicate the level of achievement of the project's original objectives and include any relevant comments on factors affecting this.**

Objective	Not achieved	Partially achieved	Fully achieved	Comments
Survey Designs and Grid				Bankalwa is largely occupied by human settlements and we surveyed at the vicinity of Bankalwa within Ramdhuni Forest and Prakashpur area to record the fishing cat. The cat was successfully recorded them from the area. Due to the topographical demand survey design was changed from grid design to line transect.
Camera Trapping				Camera trapping was conducted to record the fishing cat in Bankalwa and we were successful to record it. The camera trapping additionally recorded the eastern most record of fishing at in Ramdhuni Forest.
Water quality Analysis				Water has different quality within different parts of years and the logistics to carry out the analysis of water the year round was not feasible to carry out.
Structured Interview				Fifteen people were carried out for structured questionnaire and additionally four focal group discussions were carried out with school teachers, fish farmers, local community of Prakashpur and Ramdhuni Ban.
Awareness campaign				Awareness and outreach programmes to the students of 16 schools, two groups of fish farmers and local communities of Ramdhuni Ban, Thulimohor,

				Prakashpur and Bankalwa were organised with the support of local community.
--	--	--	--	---

**2. Please explain any unforeseen difficulties that arose during the project and how these were tackled (if relevant).**

There were many difficulties during the project. The major worry was the fear of losing camera traps from the field. The project site is near the border of India and as Nepal and India has free border the crime rates are high including smuggling of goods. Hence, we were in constant pressure of losing cameras. So, to guard the cameras everyday till the end of the project we hired a local assistant to guard them regularly.

The other difficulty was to analyse the water quality of the rivers and ponds. There were different ponds and river segments within the survey sites and we were bewildered about the samples to be taken and analysing. Also, the natural water quality changes with the passing time of the years and hence we did not take water quality samples but referred from the secondary sources.

**3. Briefly describe the three most important outcomes of your project.**

The three most important outcome of the projects are:

1. We were successful to add new distribution location of fishing cat in the eastern terai of Nepal which also became the eastern most record of fishing cat at the vicinity of Ramdhuni Forest.
2. We confirmed that the periphery of Bankalwa still holds the fishing cat population after the publication of its record from the area nearly 100 years ago by Hinton and Fry.
3. The conservation awareness programs were designed and delivered to the concern stakeholders like fish farming community of Ramdhuni Ban and Prakashpur area. Also we talked to the local community about the threats to the cats and discussed the ways to mitigate them in future as awareness programs only are not sufficient to conserve the cats when they are taking away the fish from the local fish ponds of fish farmers.

**4. Briefly describe the involvement of local communities and how they have benefited from the project (if relevant).**

Involving local community was the major parts of this project. We discussed the threats faced by the fishing cats in the human dominated landscapes of Sunsari. Our study sites for the camera traps were chosen after the consultation with local community. We now know the existing threats from human and the conflict created by the fishing cat by taking away the fish from the private fish ponds.

We conducted outreach programmes in school and among the villagers of Ramdhuni Forests and Prakashpur area about the fishing cats their distribution, food behaviour, threats and ways to conserve them. We also delivered the message why they were rare and important for the wetland in the ecosystem.

**5. Are there any plans to continue this work?**

Yes, there are plans to continue the work in the same area. I am planning to conduct my graduate study in the movement ecology of fishing cat in the human dominated landscape of Koshi river basin using radio telemetry study. I have already submitted the project proposal to the University of Delaware and waiting for the acceptance. The main goal of this study is to explore how the fishing cat population use the human dominated landscape every day, what are their exact hunting grounds, their home range and dispersion rates? In addition to that we can also record the conflict prone zone and diurnal behaviour of fishing cat in the landscape.

The other plan is to support the fish farming community of Sunsari district. Fishing cat is in conflict with human within our study area as they take away fish from the private fish ponds and decrease the profit. If the fish farmers are not motivated for the conservation of fishing cat the future of fishing cat in this area is in danger and may result to complete extinction.

We found out that Sunsari district has the fish farming pocket areas within Prakashpur and Ramdhuni Forest area and District Agriculture Office of Sunsari is promoting the local community for fish farming and sees the fish raiding species like snakes, otters, birds of prey and fishing cat as nuisance for fish farming and hence has the programs to check their presence. But the office of Koshi Tappu Wildlife Reserve has the aim to preserve wild animals and birds of the reserve and its buffer zone. Hence, there is lack communication between the inter office goals of the government. Hence I am also planning to work on bringing both the stakeholders together to find out the common ground for promoting fish farming and preserving other wildlife's including fishing cat.

**6. How do you plan to share the results of your work with others?**

The results obtained from the project will be shared through scientific publication and popular article in local newspaper. Also, the final technical report produce will be submitted to the offices of concern stakeholders.

**7. Timescale: Over what period was The Rufford Foundation grant used? How does this compare to the anticipated or actual length of the project?**

Activity	Time Period	From	To
Reconnaissance Survey	15 days	December 2015	January 2016
Camera Trap Survey	1.5 months	January 2016	February 2016
Questionnaire survey	1 month	January 2016	January 2016
Awareness campaign	25 days	November 2016	November 2016
Report writing	4 months	November 2016	March 2017

**8. Budget: Please provide a breakdown of budgeted versus actual expenditure and the reasons for any differences. All figures should be in £ sterling, indicating the local exchange rate used.**

Item	Budgeted Amount	Actual Amount	Difference	Comments
Field Staff Stipend	1260	1260	0	
Travel From Kathmandu to Morang	120	120	0	
Local Travels (A motor bike was bought)	0	1200	1200	This was bought from the support of Wild Oasis and Small Mammals Conservation and Research Foundation
Fuel Expenses	0	300	300	Fuel expenses and maintenance expenses of the bike were needed which was compensated from the lodging and food expenses
Lodging and Food	1800	1500	300	The lodging food expenses were less than expected as we stayed in homestay
Camera Traps	1000	1000		Five camera traps were bought

				from UK
Awareness Program Meetings	600	600		Tea and snacks were provided to the organizing members of awareness program in the school
GPS	100	100		A GPS was bought in Kathmandu.
Stationary (Diaries, Plastic bags, pencils, photocopies, flex, report printing)	200	200		This was provided by Small Mammals Conservation Foundation
Water Quality Analysis	200	0		We could not conduct the water quality test of the ponds due to logistics problem.
Accidental Insurance	120	120		Accidental insurance was covered for field assistances

### 9. Looking ahead, what do you feel are the important next steps?

The next step of the project is to conduct the movement ecology and behaviour study of fishing cat using radio telemetry devices and working with the community to conserve the fishing cat where both Fishing cat and the local community can live in harmony.

Also, from the policy level fishing cat must be upgraded to protected species of mammals list in Nepal. Small Mammals Conservation and Research Foundation has recommended the government to enlist the fishing cat within protected list. Without upgrading the species within protected list, the species are not within the government jurisdiction if found persecuted outside the protected areas in human dominated landscape. Unfortunately Fishing cats are in threats from direct poaching, electrocuting, hunted by watch dogs and destruction of habitats through pollution and poisoning of water for fishing within human dominated landscape of Sunsari district.

Fishing cats were historically found in Jalpaigudi district of West Bengal, India (Ingles et al. 1919) which is further east of the current study site. Hence, the fishing cat must be surveyed further east in Jhapa district of Nepal and explore whether the fishing cat population is getting dispersed across the boundary to India. This is very important to understand the whether the genetic flow of this cat is maintained even in the modern time. And if the cat is still dispersing this area would be a very important transboundary site for initiating the conservation activities between two countries India and Nepal.

10. Did you use The Rufford Foundation logo in any materials produced in relation to this project? Did The Rufford Foundation receive any publicity during the course of your work?

Yes, I produced a Fishing Cat conservation poster and used the logo of Rufford in it. Also, during the awareness campaign the flier were used with Rufford logo on it.

11. Please provide a full list of all the members of your team and briefly what was their role in the project.

12. Any other comments?

Fishing cat is a habitat specialist animal residing near wetlands, rivers and ponds in habitat. In Nepal they have been known to occur in the protected areas of Terai but the recent study shows that the human dominated landscape are equally important hunting ground of the vulnerable species. Fishing cat experience less threats in the protected area but the risks to their survival is high in human dominated landscapes. Hence, conservation activities must be focused on reducing human conflict and pressure on these species. We are thankful to RSG for financially supporting this project.
