

## Project Update: May 2016

In January, February and March 2016 six volunteering workshops were made for planting 1440 native tree species *Lithraea molleoides*.

In **photo 1**, the volunteers are digging pits where the saplings of molle were planted

In **photo 2**, volunteers are filling water barrels to irrigate saplings of molle

In **photo 3**, volunteers are planting the saplings of molle

In **photo 4**, we can see the molles subjected to irrigation treatment
