

Project Update: June 2016

Three school dropouts were selected in consultation with the local government from each three blocks. Survey protocol training conducted separately for each blocks, in sequence of Sangbaykha block, Gakiling block and Sama block. From total households, 96 households with livestock holding within 5 years from Sangbaykha block, 58 households from Gakiling block and 200 households from Sama block were identified for questionnaire survey. 50% of the households from each block were randomly selected and conducted questionnaire survey. Total number of households randomly selected and interviewed within each block; 50 households from Sangbaykha block, 30 households from Gakiling block, 100 households from Sama block.
