

Project Update: July 2016

Sorry for the delay in sending photographs. I just got back from a field season. Here are a couple of photos from my fieldwork. The first photo is a camera trap image of a white-rumped shama (*Copsychus malabaricus*) removing a faecal sac from its nest. The next one is that of the same nest box getting predated by a snake. The third photo is of Asian weaver ants carrying prey to their nest.
