

Project Update: September 2008

We have already started the halophyte afforestation. In last one week we have planted 3000 Saplings of *Salvadora persica*, *Acacia nilotica* and *Cordia* sp in Sarannath Patio desert area of Kutch some 20 km away from CEDO. We have done this to make use of the available soil moisture, The last showers of rains were on 13th Sept 2008.
