

Project Update: February 2017

We have constructed and installed the first batch of 15 nest boxes for roller in the breeding site "Gronovo" (Mogilev district) in collaboration with the Forestry Cherikov in October 2016.

We have designed and printed 300 posters with information about the roller, the main threats of the species and how everybody can help to save of therRoller.

Group "European Roller in Belarus" (Сизоворонка в Беларусі (in Russian)) with information about the roller and ways how to protect it was created in popular social networks

(Facebook, VKontakte, Odnoklassniki) and on website <http://biobel.by/index.php/laboratoriya-ornitologii/novosti/420-sizovoronka>.

We have taken part in international conference devoted to the development of the International Plan for the European Roller. The conference was implemented within the framework of the LIFE+ project titled "The conservation of the European roller within the Carpathian Basin", and targeted the revision of the first International Species Protection Plan from 2008. Eighty participants represented 27 countries at the conference. We presented information about status of the roller in Belarus during this meeting, also study and conservation activities which are carried out with financial support of Rufford Small Grants. http://rollerproject.eu/sites/default/files/allando_tartalmak/Letoltesekek/2017_ISAP_konferencia_eloadasok/belarus_maxim_tarantovich_ivan_russkikh.pdf
