

Project Update: August 2017

In past few months we finished several things. We prepared and printed leaflets and made badges. In order to show how animals behave in their natural habitat we made several short videos clips on the field. A few video clips are uploaded on YouTube (<https://www.youtube.com/watch?v=crYn7xNURfU>, <https://www.youtube.com/watch?v=akn4uF1V-f4>, <https://www.youtube.com/watch?v=D-KGXIQ7jXc>).

Lectures started in the beginning of June 2017 and were held in several primary schools in Pirot, Vlasina Rid and Bosilegrad. Besides that, we gave lecture to the master students of Ecology and Nature Conservation from the Faculty of Science and Mathematics in Niš too.

Along with these, we continued with the field activities and we found two new populations, first on mountain Gloška planina and second, very small, on mountain Bele Vode.

Left: Lecture at primary school in Pirot. Right: Lecture at primary school in Bosilegrad.

Left: Lecture for local community at Vlasina Rid. Right: Lecture for master students at Vlasina Lake.
