

Project Update: February 2017

1. As part of our tree planting programme with youths aged 19 - 35 from the three village clubs initiated by the project, we have managed to plant more than 2000 tree seedlings from their tree nursery in 5 acres of farm given to them by the District Commissioner as part of the national campaign of tree planting.
2. To cement on the previous day in the park programme in the Katavi National Park, we have shown youth in all schools reached by the project a Katavi National Park conservation film with the discussion based on the trip and lead by youth who had an opportunity to attend the trip.
3. On our day in the park programme for February 2017, we have visited Lake Tanganyika with youth to learn about aquatic ecosystem conservation, the trip has given youth an opportunity to learn about different aquatic conservation challenges and ways of addressing them from the fisheries officers.
4. As part of our programme impact evaluation, we have conducted a continuous assessment quiz with school student from the seven schools reached by the project.
5. Our new organisation website is now public www.lcmo.or.tz please visit to see more of our conservation programmes in Tanzania.
