

Project Update: July 2009

The progress of project was as follows:

1. To help the local farmers in culturing the babylone snails (*Babylonia areolata*).
2. To help the local farmers to check the growth of green mussel (*Perna viridis*) and clam (*Meretrix meretrix*) in the rehabilitated area of seagrass meadows.

Left: Local farmer checking the growth of green mussel after 5 months culturing. Right: Local farmer culturing the babylone snails.
