

## Project Update: August 2010

3<sup>rd</sup> August 2010

The officials from Public Healthcare of Suksamran district and the village volunteers, group of 20 attendants visited our RSG-mangrove Terrace at KCLC. They were very appreciative of our RSG-project concept for Mangrove Rehabilitation and Regeneration for Biodiversity.

10<sup>th</sup> August 2010

The Women Livelihoods of Suksamran participated in learning the RSG-project at our Living Laboratory. They enjoyed replanting the mangrove species at Prapas beach. They also held hand in hand as a circle to pray for the goodness and God to protect our community from any kind of disasters. This was such a wonderful activity to celebrate our Queen Sirikit's Birthday and did the good thing before the Ramadan festival (Muslim starvation month) starting on August 12 this year. There were 22 attendants.

18<sup>th</sup> August 2010

The group of 10 visitors (teachers and students) from Marb Amrit Wittaya School, Chumphon province visited our RSG-Mangrove Terrace. We have disseminated the concept of our RSG-project to this province which closes to Gulf of Thailand. They have learned and understood the overall benefit of Mangrove ecosystem.

27<sup>th</sup> August 2010

The group of 30 students from Baan Kamphuan School visited our RSG-Living Laboratory. They have learned through participatory action research about the incredible diversity within the few remaining native mangrove habitats in the Kaper Bay biome. They also participated in replanting the Mangrove species with fun.
