

Project Update: July 2010

2nd July 2010

The group of 25 students from Uttaofegiya School visited our Mangrove Living Laboratory. They have learned about what are the benefits of the mangrove habitat, where to find the mangrove species and the process of seedlings. Our RSG-nursery is one of the local knowledge contents in this area.

9th July 2010

The group of 20 students from Baan Kamphuan School visited our Mangrove Terrace to listen to the concept of the RSG-project. They also went to our RSG-nursery and then participated in replanting the mangrove species at Prapat beach. Although it was a rainy day, they all appreciated to have this learning experience outside their school.

20th July 2010

A group of 15 students from Dome Thong high school visited our Living laboratory. This school is located in Pang Nga province, the vicinity nearby our Ranong province they all appreciated our project lessons, particularly the Walkway presentation. They also participated in replanting the mangrove species in the degraded area at Prapas beach.

28th July 2010

A group of 15 visitors from the Kamphuan Agriculture Technology Transferring Center visited our RSG-mangrove terrace. Even though they are the experts in the agriculture field, they were very impressed in our RSG-project that disseminated information on biodiversity and rehabilitation. Thus, we share the same common goal in the concept of "One World - One Future - Many Species".
