

## Project Update: June 2010

8<sup>th</sup> June 2010

One of the successes of the RSG-outcomes is the growth of the 20 mangrove species in our Living Laboratory. The local schoolchildren will be more excited and happier to see their seeds that they collected by themselves are growing up.

13<sup>th</sup> June 2010

The group of 15 high school students from Dumrongsart Islamic school Suksamran, Ranong visited our Walkway Living Laboratory. They have learned about how important of the mangrove forest. The RSG-project showed them about the process of surveying, collecting, seedling and growing for the purpose of the biodiversity. They also joined in replanting the mangrove species at the degraded area.

23<sup>rd</sup> June 2010

The students of Kamphuan School visited our Mangrove RSG-nursery. They were enjoyed in studying on our Walkway. They have learned about the benefit of Mangrove forest and our RSG-project objectives. Finally, they participated in replanting the Mangrove species in the degraded area at Prapat beach. There were 27 students attended.

24<sup>th</sup> June 2010

The group of 25 local community leaders and religion leaders of Kamphuan visited our RSG-Mangrove Terrace. They were much appreciated that our RSG-project has taught their kids the knowledge of the Biodiversity and Rehabilitation. This project aims to catalyst all the community stakeholders to conserve the Mangrove forest for the next generation.
