

## Project Update: September 2010

3<sup>rd</sup> September 2010

The group of 15 students from Baan Phukaothong School visited our RSG-Mangrove Terrace. They have shared and learned in the benefit of the mangrove eco system. They will conserve the biodiversity especially for their own next generations to come.

15<sup>th</sup> September 2010

Mr. Phanuwachr Phatthadhol, the director of Kamphuan Community Learning Center visited the Mangrove Development Station of Kloong, Chantaburi Province in a coast on Gulf of Thailand. This meeting aimed to exchange and share in the mangrove knowledge. Mr. Boonyarit Jitraksa, an expertise in local mangrove habitat of Kloong site had presented his work that used to make our highness Royal Princess Sirindhorn impressed. It is a very good opportunity to establish the network among us and he agreed to be one of our advisors of our RSG-programme.

26<sup>th</sup> September 2010

The group of 30 students from Musbahusdean School participated in learning our RSG-project at the nursery. They were very excited in our Living Laboratory and the benefit of the Mangrove forest. They were enjoyed replanting the Mangrove species at Prapas beach. They found this program is useful and interesting. We all hands in hands prayed for the good things after this meaningful activity.

29<sup>th</sup> September 2010

These were a group of 20 members from the women and their relatives who had been affected by the HIV disease. They were the special guests who visited our RSG-Mangrove Terrace. If we see our self-worthiness, we also can see the Mangrove benefits. This is the equilibrium in human, community and environment which we live.
