

Project Update: December 2009

In total, we still have 28 participants in four villages that joined us in order to create land preparation. We have an invitation from a farmers group from Lambaya Village to help them in order to help in paddy's planting process through class teaching, not only in the rice field.

In December 2009, we have a plan to create planting for paddies in four villages, because we have 12-day old seed the seedbed.
