Wangdue Forest Division**

Presentation Outline

General background of Hog Deer, Distribution and its status in IUCN

Peoples perception on present status of Hog Deer

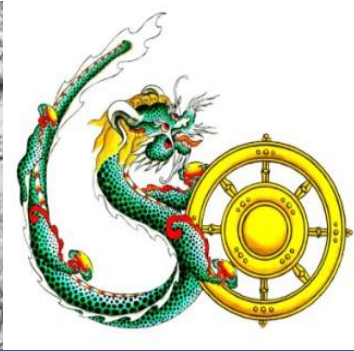

Crop depredation by Hog deer and mitigation measures

Threats of Hog deer

Background of Hog deer

Population
trend
Decreasing

Conservation status

CITES
Appendix I

IUCN
Endangered

Distribution :

southern foothill of Bhutan Bangladesh; Bhutan; Cambodia; India; Nepal; Pakistan

Possibly extinct:

China; Lao People's Democratic Republic;
Myanmar; Viet Nam

Reintroduced:

Thailand

Peoples Perception on Present Status of Hog Deer

- How many of you think conservation of hog deer is important ?
- why population of hog deer are decreasing ?
- What are the mitigation measure taken from crop depredation

Mitigation Measure

Fencing by wire mess and mosquitoes net

Night guarding

Electric fencing

Threats to Hog Deer in Bhutan

Deforestation

Urbanization

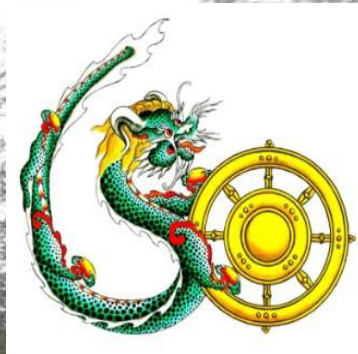

Poaching by Indian border

local hunter

Predator
