

Project Update: February 2018

The field activities have been for me an occasion to do the advocacy in the forest services located in the north of Dahomey gap when we were coming back from the field.

Please, find attached the photos of awareness in the villages of Sègbanou and Igbo-Idi around the forest islands of Pahou and Pobè respectively.

In Sègbanou, you can remarked the presence of a forest officer in his professional dress (green). After my presentation at the conference in Cambridge, I will send you other photos.
