

Project Update: September 2017

The team is excited and getting ready, tomorrow we will start surveying our sites.

Also when I was in the USA I presented our project in the Maldives and Rufford small grant at Scripps Institute of Oceanography, UCSD. It was a success!

The team started the surveys and we found a decline from 40% to 0% since 2016.

Site 1

We are also getting ready for the student field trip later this week.

New site

The undergraduate course was a success! We had 55 students mainly female, plus lectures and teachers.
