INTRODUCTION

Key Ecosystem Services

Seed Dispersal

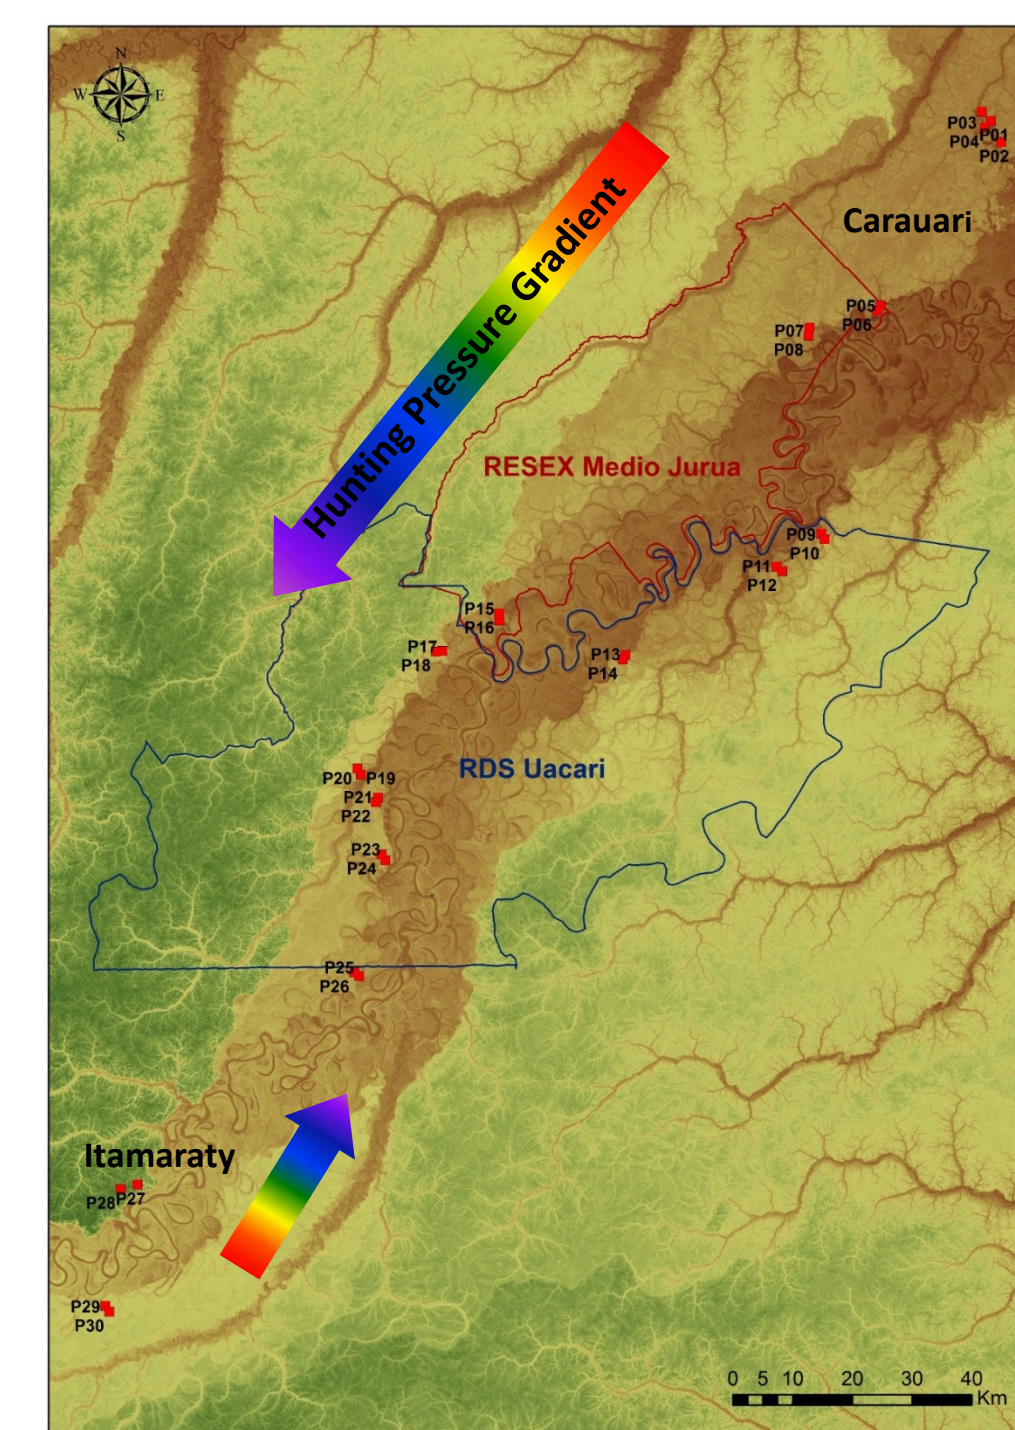

CASCADE EFFECTS

This project aims to examine the effects of hunting-induced defaunation on vertebrate community, forest regeneration and carbon stocks in high-diversity forests of central-western Amazonia

As key working hypotheses to be tested, overhunted forests for over a century will:

- (1) have lower prevalence of tree species with functional traits linked to seed dispersal by large vertebrates
- (2) show higher compensatory abundance of small-mammal seed predators
- (3) sustain lower aboveground biomass and carbon stocks because of lower tree basal-area density of heavy-wooded tree species.

PRELIMINARY RESULTS

Saimiri macrodon

Sapajus macrocephalus

Potos flavus

Saguinus mystax

Species binomial	English name
Mammals	
Didelphimorphia	
<i>Caluromys lanatus</i>	Brown-eared Woolly Opossum
<i>Didelphis marsupialis</i>	Common Opossum
<i>Glironia venusta</i>	Bushy-tailed Opossum
<i>Metachirus nudicaudatus</i>	Guianan Brown Four-eyed Opossum
<i>Philander spp.</i>	Gray Four-eyed Opossum
Pilosa	
<i>Bradypus spp.</i>	Sloth
<i>Choloepus spp.</i>	Two-toed Sloth
<i>Myrmecophaga tridactyla</i>	Giant Anteater
<i>Tamandua tetradactyla</i>	Southern Tamandua
Cingulata	
<i>Dasybus kappleri</i>	Greater Long-nosed Armadillo
<i>Dasybus novemcinctus</i>	Nine-banded Armadillo
<i>Priodontes maximus</i>	Giant Armadillo
Perissodactyla	
<i>Tapirus terrestris</i>	Brazilian Tapir
Artiodactyla	
<i>Mazama americana</i>	Red Brocket Deer
<i>Mazama nemoriva</i>	Grey Brocket Deer
<i>Pecari tajacu</i>	Collared Peccary
Primates	
<i>Aotus spp.</i>	Night Monkey
<i>Alouatta seniculus</i>	Colombian Red Howler Monkey
<i>Ateles chamek</i>	Black-faced Black Spider Monkey
<i>Leontideus rosalia</i>	Woolly Monkey
<i>Cebuella pygmaea</i>	Pygmy Marmoset
<i>Saguinus fuscicollis</i>	Spix's Saddleback Tamarin
<i>Saguinus mystax avilapiesi</i>	Moustached Tamarin
<i>Saguinus mystax mystax</i>	Moustached Tamarin
<i>Cebus unicolor</i>	Spix's White-fronted Capuchin
<i>Sapajus macrocephalus</i>	Larged-headed Capuchin
<i>Saimiri boliviensis</i>	Bolivian Squirrel Monkey
<i>Saimiri macrodon</i>	Ecuadorian Squirrel Monkey
<i>Cacajao calvus calvus</i>	Bald Uacari
<i>Callicebus cupreus</i>	Red Titi Monkey
<i>Callicebus torquatus</i>	White-collared Titi Monkey
<i>Pithecia albicans</i>	Buffy Saki
<i>Pithecia monachus</i>	Monk Saki

FAUNA SPECIES LIST

Mammals	
Carnivora	
<i>Atelocynus microstis</i>	Short Eared dog
<i>Speothos venaticus</i>	Bush Dog
<i>Leopardus pardalis</i>	Ocelot
<i>Leopardus wiedii</i>	Margay
<i>Panthera onca</i>	Jaguar
<i>Puma concolor</i>	Puma
<i>Puma yagouaroundi</i>	Jaguarundi
<i>Eira barbara</i>	Tayra
<i>Gallictis vittata</i>	Greater Grison
<i>Potos flavus</i>	Kinkajou
<i>Nasua nasua</i>	South American Coati
<i>Procyon cancrivorus</i>	Crab-eating Raccoon
<i>Potos flavus</i>	Kinkajou
Rodentia	
<i>Cuniculus paca</i>	Lowland Paca
<i>Dasyprocta spp</i>	Agouti
<i>Myoprocta spp</i>	Acouchy
<i>Proechimys spp</i>	Spiny Rat
<i>Coendou spp.</i>	Porcupine
<i>Sciurus ignitus</i>	Bolivian Squirrel
<i>Sciurus spadiceus</i>	South American Red Squirrel
<i>Guerlinguetus sp.</i>	Squirrel
<i>Urosclirus igniventris</i>	Northern Amazon Red Squirrel
<i>Urosclirus spadiceus</i>	Southern Amazon Red Squirrel
Birds	
Tinamiformes	
<i>Tinamus guttatus</i>	White-Throated Tinamou
<i>Tinamus major</i>	Large Tinamou
<i>Crypturellus spp</i>	Small Tinamou
Galliformes	
<i>Penelope jacquacu</i>	Spix's Guan
<i>Pauxi tuberosa</i>	Razor-billed Curassow
<i>Odontophorus stellata</i>	Wood Quail
Piciformes	
<i>Ramphastos tucanus</i>	White-throated Toucan
<i>Pteroglossus beaufortensis</i>	Curly-Crested Aracari
<i>Pteroglossus mariae</i>	Brown-Mandibled Aracari
<i>Selenidera reinwardtii</i>	Golden-collared Toucanet
Gralliformes	
<i>Psophia leucoptera</i>	Trumpeter

Tinamus major

Pauxi tuberosa

Ramphastos tucanus

Psophia leucoptera

NEXT STEPS

The database construction is in progress with the camera trapping survey being analysed and laboratory activities being carried out at the National Institute of Amazonian Research (INPA/Brazil) to obtain plants traits: wood density and LMA. With the wood density data will be possible estimate aboveground biomass (AGB) for each one of the sample sites.

Using a combination between the camera trapping survey of this project and a database of vertebrates abundance based in linear transects census will be possible to generate a defaunation index for our 30 sites in the hunting pressure gradient.

A first view of our camera traps records indicates a lower abundance of some larger vertebrates in areas with greater hunting pressure close to urban centres. In this location there seems to be an increase in spiny rats, which suggests initial evidence of defaunation cascade effects. This tendency will be further analysed.

The exploratory ordination of the saplings composition did not show changes in sites with different hunting pressure. However, using our future seed size database we will able to analyse if there is a directional prevalence change of species dispersed by large vertebrates.

"The most insidious kind of extinction is the extinction of ecological interactions"
Daniel H. Janzen 1974

FOREST REGENERATION

- 13,356 plants sampled:
 - 2,587 palms
 - 5,981 saplings
 - 4,788 trees

- 929 species from botany families

- 500 tree height measured

- ~700 wood core collected

First view of sapling composition at the 30 sample units

Ordination by NMDS using bray-curtis distance for saplings composition at the 30 sample sites on médio Jurua hunting gradient (stress=0.20)

During the internship at East Anglia University, with Professor Carlos Peres we are going to:

- obtain a defaunation index for each one of the 30 sites along the hunting pressure gradient;
- Elaborate seed size database based on our tree composition data;
- Test statistically the hypotheses proposed in this projects →singular project

The present work will provide theoretical tools for hunting management in the Amazon, pointing out the importance of maintaining ecological interactions for forest regeneration, carbon storage and consequently for conservation valuation.
