

Project Update: December 2017

As per my proposal objective 2, we carried out an amphibian trail (1 km walk) in Honey valley estate Coorg in November 2017. Dr Gururaja KV as a part of my team took the lead in the amphibian trail and showed participants how to identify (including ethical handling) amphibians in the field.

Participants in the amphibian trail

Participants along with Dr Gururaja

Raorchestes species

Identifying frog in the field by Dr Gururaja

Hydrophylax species

Fejervarya muuduraja
