Project Update: November 2017

Between October 30th and November 3rd 2017, we presented our project's findings at the 'XXI Congreso de la Sociedad Mesoamericana para la Biologia y la Conservación or SMBC (Photo 01).

During our participation, we presented:

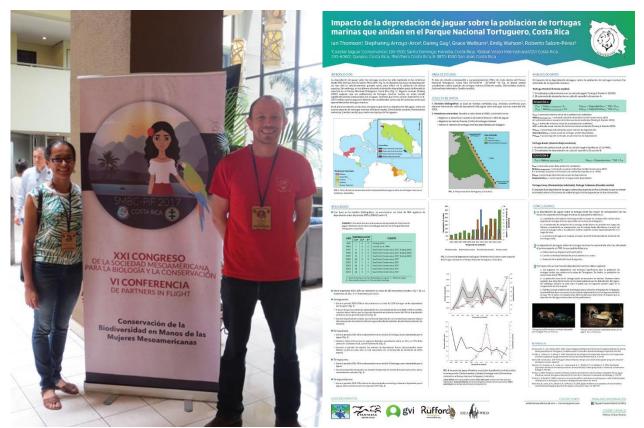

- 1. A poster entitled 'Impact of jaguar predation on the population of sea turtles that nest in Tortuguero National Park, Costa Rica' (Photo 02-05).
- 2. An oral presentation about the 'Social dynamics of the jaguar population in Tortuguero National Park, Costa Rica' (Photo 06).
