

## Project Update: April 2018

During the period of February and April, we worked on promotion of the first part of the research results and second part of fieldwork. This included several activities, such as:

1. For all species we determined ecological parameters.
2. Project was presented at 27th RSG CONFERENCE "FROM MOUNTAINS to DEEP SEAS". In a presentation titled Diversity and Ecological Analysis of the Liverworts in the Cijevna River (Montenegro and Albania) we presented some new liverworts which are registered in the research area.
3. We prepared first scientific publication. Publication was titled "New and interesting bryophytes of Albania and Montenegro". This paper is under revision in journal Herzogia.
4. Project was presented at First Lego League Montenegro, under theme "Hydro dynamics". This is one of biggest science promotion events for children in Montenegro.
5. Also we did a second field trip during which we collected bryological material with sporogon for better determination of species.
