

### **Project Update: April 2019**

In the last 3 months I have been working in data analysis and in the Campos de Altitude vegetation video. I am at the end of the process of video editing and I believe that in early May 2019 the video will already be on YouTube. Data analysis will extend until the end of the project, so the conclusive results are likely to be ready in September 2019. Besides that, as expected, an additional field trip will be realised in July 2019.
