

Project Update: November 2019

Activates preparations

We bought the boat, UV protection t-shirt for seaweed sampling and all the material for the field surveys.

Research activities:

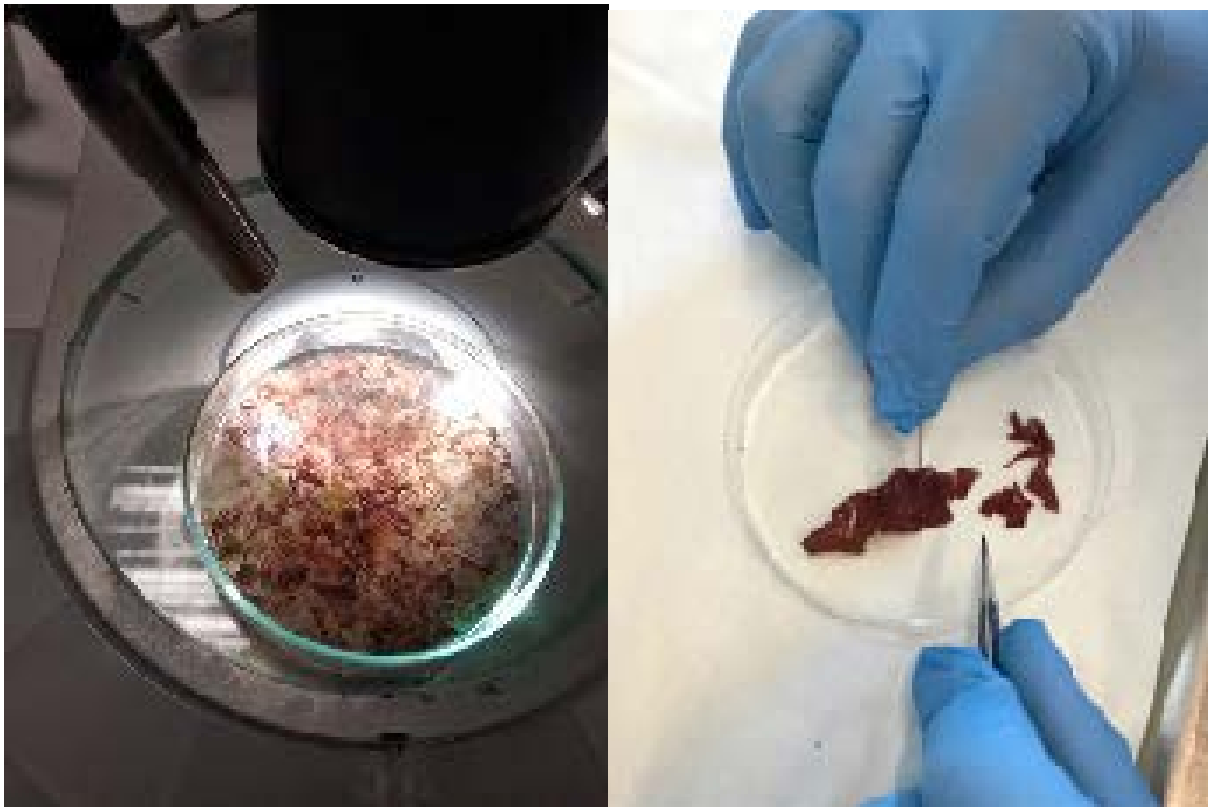

We perform 50 oesophagi lavage in CMPA of Cerro Verde and Islas de La Coronilla

Seven seaweed field samplings in Isla Verde and Punta del Diablo.

Last month we start with the lab working to identify the seaweed species in the

oesophagi lavage of green sea turtles. We also start a phylogenetic study of *Grateloupia turuturu* in all the Uruguayan coast.

Education and outreach

We start to design the color book in the first three meetings.

We participate in the Rufford Conference in Punta del Este Uruguay
