

Project Update: August 2019

Finally our report on the e-commerce of felines and primates in the Mexican Facebook and the WWW is done. (Attached). We had just so much data that we ended up with 53 pages in the PDF version.

Sadly, I was attacked by some capuchin monkeys in a confiscated wildlife refuge so all my pics and camera are gone, but I got some few pictures from my colleague Rodrigo Villalobos (which is also a Rufford Grantee from "Searching for the Andean Cat"), whom CATCA EWS sponsored to promote his work and CATCA's work at my stand there.

Thanks to these capuchin monkeys bites on my legs, I will need to go to the CITES CoP in 2 1/2 days with wheelchair assistance up to Geneva. On the 18th I will host a side event about the traffic of primates there.

CATCA Environmental and Wildlife Society and the International Primate Protection League are pleased to invite you to our event:

**ILLEGAL TRADE IN APES
AND OTHER WILDLIFE IN
AFRICA AND THE AMERICAS**

Guest speakers:
Ian Redmond OBE, IPPL & Ape Alliance
Ericka Ceballos CEO CATCA EWS
Adams Cassinga CEO of ConservCongo
Daniel Stiles Independent Wildlife Trade Investigator

Refreshments will be served after the presentations

DATE: Sunday August 18th, 2019 TIME: 19:00 - 21:00 ROOM: Hall 3

Here is the postcard of the event:

**E-Commerce of Jaguars and other wild felines
in Mexico and The Americas**

Presented by: Ericka Ceballos
CATCA Environmental and Wildlife Society

CATCA
Environmental and Wildlife Society

Mortality of jaguars and other felines in the Americas

Presented by: Ericka Ceballos
CATCA Environmental and Wildlife Society

This presentation
was made with the
kind support of:

The Belize Zoo &
Tropical Education Center

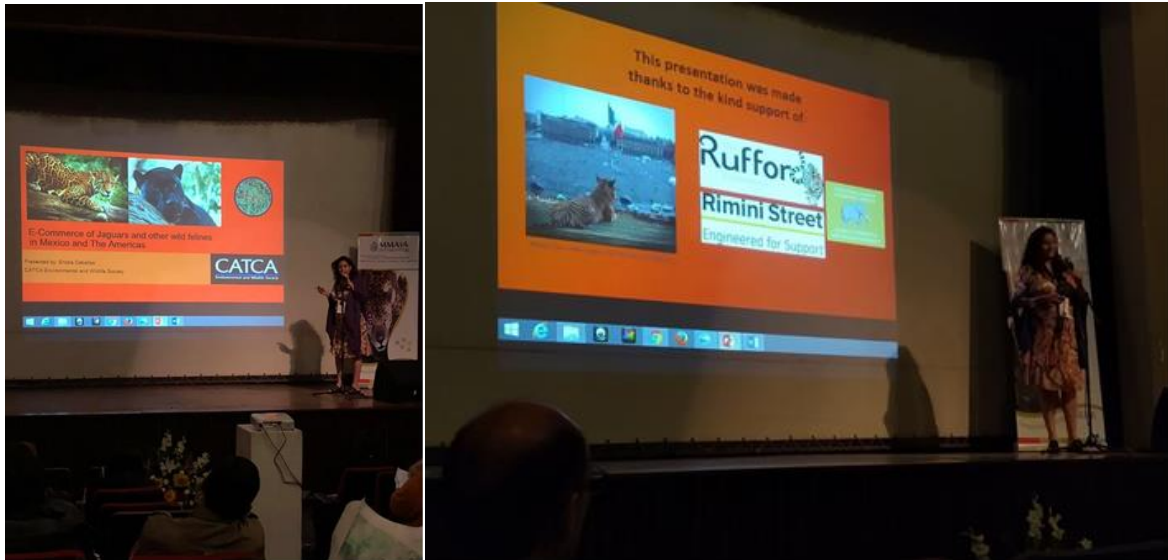

Rimini Street

Engineered for Support

The Rufford
Foundation

Here are some few pics of the two presentations I had in Bolivia.

Now to lobby in CITES! After this, we will continue with the regular monitoring of the Mexican WWW. My team and I are exhausted. In 1 year we worked over 4,000 hours monitoring and capturing data, which more than half is from Facebook alone.
