

## Final Evaluation Report

---

| Your Details               |  |
|----------------------------|--|
| <b>Full Name</b>           | Raharisoa Marie Wai-Line   |
| <b>Project Title</b>       | Protection strategy for forest fragments in the protected area Corridor Forest Bongolava in collaboration with the community |
| <b>Application ID</b>      | 31313-1  |
| <b>Grant Amount</b>        | 5.764£   |
| <b>Email Address</b>       | marie.wailine@gmail.com  |
| <b>Date of this Report</b> | 15/09/21   |

**1. Indicate the level of achievement of the project's original objectives and include any relevant comments on factors affecting this.**

| Objective  | Not achieved | Partially achieved | Fully achieved | Comments  |
|--|--------------|--------------------|----------------|---|
| Effective management of occupants in AP Corridor Forestier bongolava |              |                    |                | We have identified 685 occupants, who were the subject of the specifications signed between FBM team and each interested party. But there are still unidentified occupants in the southern part of AP (district Mampikony). |
| Contribution to sustainable wood supply                              |              |                    |                | About 9003 seedlings have been produced of which 6873 are planted.  |

**2. Please explain any unforeseen difficulties that arose during the project and how these were tackled.**

We have a problem with the water supply when producing seedlings. We had to install a well with the establishment of the nursery.

**3. Briefly describe the three most important outcomes of your project.**

From this project, here are the three most important results:

- The occupants in northern part of the AP Corridor Forestier Bongolava are identified and have signed a specification.
- A nursery centre meeting the needs of the FBM team is installed.
- 6873 seedlings are planted.

**4. Briefly describe the involvement of local communities and how they have benefited from the project.**

During this project, the involvement of local communities was made at all levels ranging from indigenous authorities and villagers. The authorities were fully engaged during organisational meetings on the identification and census of occupants inside the protected area of Corridor Forestier Bongolava.

**5. Are there any plans to continue this work?**

The protected area of the Corridor Forestier Bongolava is made up of two districts: Mampikony et Port-Bergé. From this project, we were able to identify the occupants in these two districts. But only the information on the land of the occupants in the district of Port-Bergé is known. In the future, we deem it necessary to continue this

project by collecting information on the land of the occupants in the district of Mampikony and hire these occupants as planned by signing a specification. Also, with the growing demand in relation to the energy needs of the local population, we plan to initiate the charcoal sector at the level of a few potential municipalities.

**6. How do you plan to share the results of your work with others?**

We plan to publish our work through the journal *Conservation Evidence* but this is in progress.

**7. Timescale: Over what period was the grant used? How does this compare to the anticipated or actual length of the project?**

The project started in July 2020. Compared to the planned duration (1 year), there is no significant delay.

**8. Budget: Provide a breakdown of budgeted versus actual expenditure and the reasons for any differences. All figures should be in £ sterling, indicating the local exchange rate used. It is important that you retain the management accounts and all paid invoices relating to the project for at least 2 years as these may be required for inspection at our discretion.**

| Item   | Budgeted Amount | Actual Amount | Difference | Comments   |
|--|-----------------|---------------|------------|--|
| 2 tent   | 107             | 151           | +78        | 1 tent   |
| 4 Sleeping bags                                  | 89              | 167           | +44        | 2 sleeping bag   |
| 2 GPS  | 400             | 311           | -89        | 2 GPS  |
| 4 beche  | 27              | 40            | +13        | 6 beche  |
| 2 Hammer   | 11              | 11            |            |  |
| 1 Tape of measure                                | 11              | 11            |            |  |
| 150 pots pack                                    | 167             | 276           | +109       | 250 pots pack  |
| Seed purchase                                    | 67              |               | -67        | The seeds used were collected by the FBM Team            |
| Sand for compost                                 | 89              | 133           | +44        |  |
| 54 Notebooks for occupant registration           | 37              | 37            |            |  |
| Fuel during meeting in 54 fokontany              | 1008            | 1181          | +173       |  |
| Team catering during the meeting in 54 fokontany | 1200            | 1800          | +600       | Collective catering (with the authorities)               |
| Living allowance of the authorities at the       | 240             | 540           | +300       | 1 representative of the municipality, 1 village chief, 1 |

**9. Looking ahead, what do you feel are the important next steps?**

- Collection of information on unidentified occupants.
- Identification of potential municipalities in relation to the charcoal sector.
- Choice of species adapted to the charcoal sector.

**10. Did you use The Rufford Foundation logo in any materials produced in relation to this project? Did the Foundation receive any publicity during the course of your work?**

The Rufford Foundation logo was used as a partner in the FBM team's first semester (2021) performance report. This document was prepared following the request of the ministry responsible. During the realisation of this project, some photos illustrating the progress in seedling production were shared with the foundation.

**11. Please provide a full list of all the members of your team and briefly what was their role in the project.**

**Miandrimanana Cyprien:** executive director who provides the management of activities and the FBM Team.

**Raharisoa Marie Wai-Line:** head of conservation unit, who managed this project.

**Michel Rochard et Faliarivo:** nurseryman, seedling production.

**Radaniel et Jacquot:** identification of the occupants, location of the land in the Andranomena, Ampombibe, Belinta area and seed collection.

**Ranjakaso Albert et Tsaravintana:** identification of the occupants, location of the land in the d'Ampitilimaika, Marosely, Ankotokomby area and seed collection.

**Razafindramainty Fleurie et Rafaly André:** identification of the occupants, location of the land in the Ampombibitika, Ambalavary area and seed collection.

**Randriamananjoky et Tovona:** identification of the occupants, location of the land in the Ampombibe, Tsiraipoko area and seed collection.

## **12. Any other comments?**

Following the intervention of The Rufford foundation, FBM team was able to develop a collaboration with Graine de Vie Madagascar.
