

Project Update: December 2020

I have been conducting the field work and conservation activities in Bangladesh after withdrawing the lock down by the Bangladesh Government since June 2020. Please find the attached pictures to know the conservation and research activities on western hoolock gibbon which has been held since July 2020. As I am conducting the field work, pandemic Covid-19 will not affect the implementation of the project according to time frame. Already, I have set up the field activities for the project.
