

## Project Update March 2024

We concluded successfully the first dissemination of results. We launched the pocket guide in a birdwatching event in a square, one of my sampling units on March 23, 2024. The event attracted more than 50 participants, and was conducted with the support from Instituto Mamede, our partner in the project. I'm handing out the pocket guides to people who accompanied me in the field too.

This first launching event included the participation of people of different ages and interested in observing and photographing wildlife. It took place in

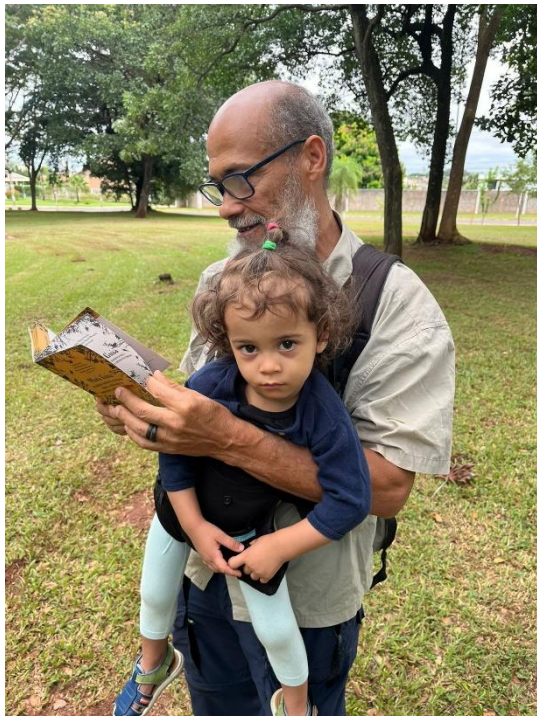

one of the project's sampling units, the Bosque da Paz square in Campo Grande.
