

Project Update: January 2010

On the BSPB website you can find information for the Egyptian Vulture expedition which we made to Ethiopia. http://bspb.org/show2.php?id=1408&menu_id=33

The results were very good but it seems that a small number of the Bulgarian vultures winter there, so they probably are in Chad and Sudan, as once in 2001 the only satellite tracked bird wintered in Chad.
