

Project Update: November 2012

During this programme, OMCAR Foundation Environmental Education Officer Mr. Mohan Raj and coordinator Mr. Anbu have explained about the importance of seagrass beds, dugongs and how they help for local fishery. They explained this with posters and direct interaction with children. After this lecture, a seagrass pamphlet was donated to each student. This booklet has the picture of local seagrass beds and dugong. After the tea break the students were asked to draw the dugong picture from the booklet. The programme was held for about two and a half hours. The school teachers finally thanked OMCAR Foundation. A group photo was taken at the end of this programme. OMCAR Foundation is inviting other school students to attend this monthly programme. We expect to cover more schools before coming summer.
