

## Project Update: April 2011

A bilingual poster has been released on the conservation of otters. The key message of the poster is 'save the otters in Nepal'. It includes images of all the species of otters recorded in Nepal. It is expected that the poster will be helpful in helping the general public, especially youths, to know that otters are present in Nepal, and they are at risk here. Any individual or organisation wishing to reproduce this poster can receive the design copy of the poster in electronic format.
