

Project Update: July 2009

First field work has recently been completed. A brown bear habitat survey was carried out in a different area of the Upper Mustang region of Nepal. A Conservation education programme was also conducted in different schools in the study area. We will go on next field trip in December 2009 and we will also going to organize a National Level Brown Bear Conservation Action Plan from December 20th - 24th 2009.
