

Let's create better future for sharks, skates and rays in the eastern Adriatic:
towards the unique regional protection

National Geographic: Sharkfest

Each year Nat Geo WILD delivers six days of shark-infested programming called the Sharkfest with takes you up close and personal with one of nature's most feared and often misunderstood predators sharks ! During the Sharkfest 2020, Andrej got featured as one of the key Explorers working on the effects of pollution on elasmobranchs health and development of the long-term in-situ conservation plans.
